

# Nimble Numbers

---

## Annotation

Enoka can read symbols for some numbers and some operations.

## Problem: Nimble Numbers

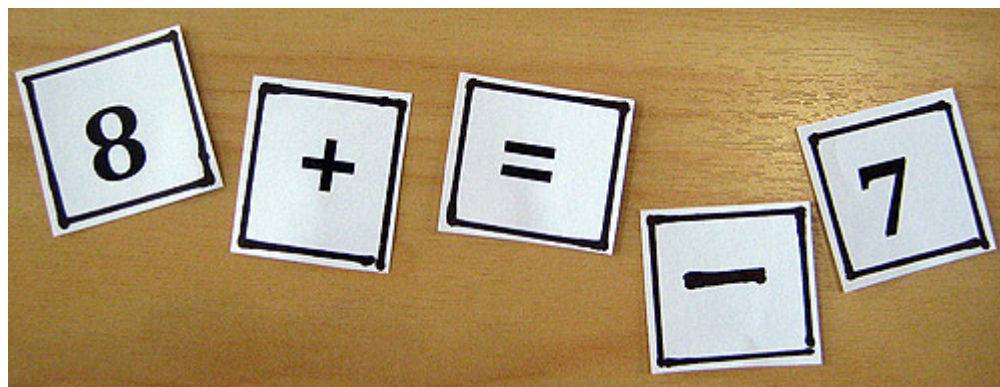

The class is playing *Nimble Numbers* in the playground. Large numerals and operation symbols are painted on the asphalt surface. When the teacher calls “Nimble Numbers!”, each students must run to and stand on a symbol or numeral. Students cannot stand together on the same symbol or numeral. The teacher has several cardboard copies of each of the numerals and the symbols.

The teacher explains:

*I am going to hold up some cards with numerals and symbols on them. If I hold up the card for the numeral or symbol that you are standing on, raise your hand. I'll ask you to tell me what the card says. If you are right, you keep the card. Then we will see who can collect the most cards.*

## Student Response

Enoka earns these cards in the game.

Teacher: Can you tell me again what your cards say?

Enoka: Eight, plus, equals, take away, seven.
