

PATTERNS AND RELATIONSHIPS – SET 3

A Create and continue a pattern and identify the unit of repeat

Spatial Pattern

The first pattern uses 4 match sticks, the second uses 3 more matchstick, the third uses 3 more matchsticks.

$$4 + 3 + 3$$

B Continue and describe a pattern

What would the next pattern look like?

How many sticks in the pattern.

$$= 4 + 3 + 3 + 3$$

$$= 13$$

Number Pattern

This patterns is counting up in 6s or +6 more.

What are the next 3 numbers in this pattern?

Describe.

$$24 + 6 = 30$$

$$30 + 6 = 36$$

$$36 + 6 = 42$$

All of the patterns end with 6,2,8,4,0

C Continue the pattern to work out the ordinal position.

Up to 4 elements of repeat

There are four patterns that repeat.

What would the 14th element look like?

Pattern ends on 4 ,8, 12

$$12 + 2 = 14$$

2nd unit in the pattern =

2 variable pattern

The shapes have 3 units of repeat
And the pattern has 2 units of repeat.

What would the 10th element look like?

Shape pattern ends 3,6,9

$$9 + 1 = 10$$

1st unit of pattern = circle.

Shading pattern ends 2, 4, 6, 8, 10

Last shade in the pattern = black
