

Am I right?

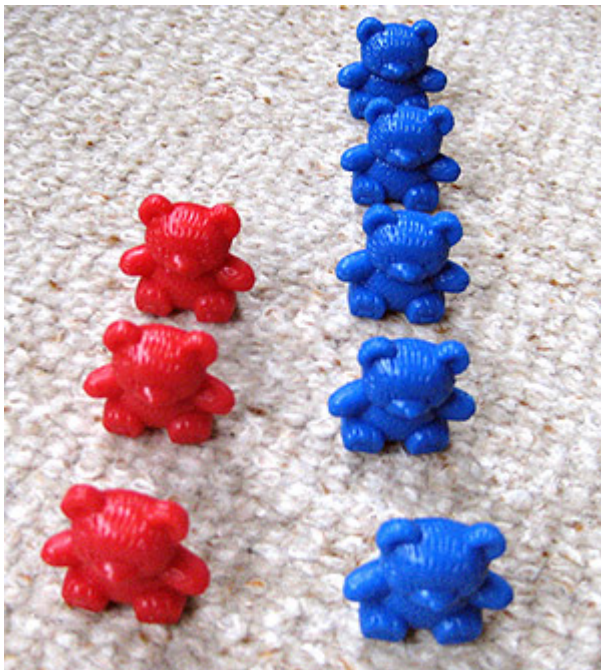

Annotation

Rocky is able to compare collections and disagrees with an incorrect data statement, however he is unable to explain his thinking.

Problem: Am I right?

The teacher places in front of the student a collection of 3 red plastic teddies and a collection of 5 blues ones, and poses this problem:

There are more red teddies than blue teddies. Am I right?

Student response

Rocky: No-o.

Teacher: Can you tell me some more.

Rocky: Runs his hand down beside the blue line of teddies but says nothing.
