# MULTIPLICATIVE THINKING — SET 1
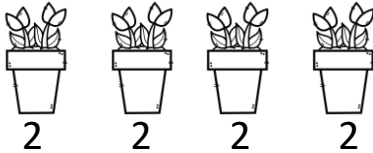

(A) *Can understand and match and group 'same' quantities of objects together.*

(B) *Can split objects into two groups with the same quantities.*

(C) *Can recognise that each 'group of' is the same, but cannot total.*

2   2   2   2

How many altogether?
I don't know

3   3   3

How many hearts are there in total?
Umm maybe 10?
