Team time

Annotation

Lucas can correctly read and understand a written division equation and can suggest an appropriate problem context.

Problem: Team time

The teacher shows the following equation to the student:

16 ÷ 4 = 4

Then the teacher asks:

Can you read this for me?

Student Response

Lucas:	Sixteen divided by four equals four.
Teacher:	Can you suggest a situation where you could use this equation?
Lucas:	Well, if there were sixteen kids and they had to make four teams, there'd be four kids in each team.
